Moving from Success to Significance is a pause in the game of life to reflect on who we are, what really matters to us and our enormous capacity to make an indelible impact on the lives of others.

International thought-leaders Sir John Whitmore and Niran Jiang will examine the leadership qualities needed by women today, and will inspire them take a bigger role beyond their current circumstances to lead more effectively for corporate and social change.

Over lunch, they will challenge each of us to urgently develop our own unique talent and qualities through their presentations and interactive discussion which will address how we can live our values and encourage others to do the same.
